

Job Description: Front-End Developer

Position Type: Permanent.

Location: Farnborough head office or Remote.

Benefits include: 25 days holiday + 3 additional days over Christmas, private medical insurance, life insurance, company pension scheme, Cycle-to-Work scheme, free non-fiction book scheme.

Working Hours: Full time.

Start date: ASAP.

Our mission is to create innovative technology solutions and provide ongoing support that improves the delivery of care

Our new Front-End Developer will be directly responsible for the development and deployment processes. You will make sure that our product's features are shipped optimally, and that the product stays healthy once it hits production.

Reporting into the Server Team Lead you will be part of a team of highly skilled engineers to deliver polished features on consistent basis in a high pace environment. We deploy code every two weeks to thousands of users.

At everyLIFE we design, build, release, manage and support software and applications that are crucial parts of the physical care being given to tens of thousands of vulnerable people across the UK. We come together to help those who have challenges beyond own control and need to be cared for in their own unique way.

Our ideal teammates are thoughtful, humble, curious and achievement-oriented professionals who can both zoom into the details and zoom out to embrace the big picture. We are customer and transparent, we act fairly, openly and honestly in everything we do.

You will:

- Design, review, write and test code – this is hands-on engineering role, and you will be directly involved in the design and development of new features, writing, reviewing and testing code.
- Insist on the highest standards and create functional and engaging features that will delight our users.
- Provide mentorship and feedback to teammates to make your team the best version of itself. Motivate and encourage everyone to give their best work.
- Be a self-starter, analytical and creative.
- Be a strong team player with a positive attitude.
- Be a strong advocate of software craftsmanship, write clean, testable and easy to maintain code.

You have:

- 3+ years of web development experience.

- Good communication skills and the ability to work effectively in a remote team environment
- Attention to details – any code that makes it into the product directly impacts the lives of people being cared for.
- Strong web development with React.js, TypeScript, HTML and CSS, SASS, bootstrap, webpack, npm.
- Good understanding of AngularJS, bower, gulp for maintaining existing codebase.
- Solid familiarity with single page apps and building UI components.
- Good understanding of WCAG accessibility standards and UX/UI.
- Strong experience writing clean, testable, high-quality code and designing highly scalable systems in production.
- Good understanding of HTTP and integrating APIs.
- Good experience with writing unit tests, preferably TDD and BDD.
- Familiarity with git and/or git-flow, Bitbucket, JIRA, Confluence, Jenkins.

You may have:

- Bachelor's degree in Computer Science or related field, or equivalent experience.
- Good understanding of micro frontend and Redux.
- Experience within the Care Industry or Health Sector.
- Good knowledge of Agile methodologies such as Scrum or Kanban.
- Good knowledge of cross-platform technologies such as React Native and Flutter.
- Good knowledge of test automation using TestCafe, CypressJS or similar.
- SaaS experience in a B2B setting.
