

# PASSsystem Device Requirements

---

Version 3 – 17 October 2017

The following update explains compatible and tested devices for use with The PASSsystem.

|                                   |   |
|-----------------------------------|---|
| <b>Web Browser</b>                | Describes the browser for use with The PASSsystem |
| <b>Tablets</b>                    | Describes tablets for use with The PASSsystem     |
| <b>Televisions &amp; Monitors</b> | Describes other devices to display The PASSsystem |

## Web Browser

The PASSsystem is supported on the latest version of **Google Chrome**.

## Tablets

The PASSsystem app is available on the **Android** operating system. Please ensure your device meets these minimum requirements:

- Android v4.4 (**KitKat**) or above
- From 1st June 2018 The PASSsystem will no longer be supported on devices running versions of Android prior to 5.0. We recommend using **Android v6.0** or above.
- Device memory (RAM) must be **2GB or more**
- Screen size **9" or larger**
- WiFi or 3G/4G ready

## Televisions & Monitors

You may wish to display The PASSsystem via a web browser on a TV or Monitor in your office. Your SMART enabled television must allow the use of **Google Chrome**.

Please note: televisions are not governed by the same levels of security and risk management software.

Please call **0800 689 3068** (option 1) to speak with our Customer Support team or alternatively email [customerservice@everylifetechnologies.com](mailto:customerservice@everylifetechnologies.com)
